

## Telaid Provides a Single Vendor Solution for Staging, Configuration and Deployment.

Telaid's 25 year heritage has been focused on providing communication infrastructure technology for multi site deployments for the largest companies in the nation. Years of experience and service excellence has positioned Telaid as the premier single vendor solution provider and has now further enhanced its offering with the addition of Staging and Configuration.

No one understands more than Telaid that nationwide deployment is a business critical process and requires extensive planning for consistency and quality across multiple sites for rapid deployment. Our Single Vendor Solution for Staging, Configuration and Deployment of Network Electronics and Upgrades plus our National Service Delivery Organization offers that assurance and helps streamline the process for multi-site projects.

### TELAID'S STAGING & CONFIGURATION OFFERS:

- > Maintenance
- > Remote System Monitoring
- > Rapid Deployment of Multi Site Installations

### SUMMARY

Today's most successful organizations rely heavily on technology to support rapid growth and changing business needs. Decision makers must address not only the design and selection of a high-tech solution, but also the challenge of deploying the new system for multiple users and locations.

Telaid provides the expertise throughout all stages of a full-scale deployment, including project preparation, design, configuration, staging, delivery, installation and cutover, for any combination of internetworking devices, desktop services and applications and site readiness requirements.
