

ReCycle, ReNew and ReUse - RESPONSIBILITY

Technology Assets only hold value if they are effective at meeting the business needs. Today's technology is changing at a fast pace. Companies need to react to the needs of the business as well as the rules and regulations of the Local, State and Federal Government.

As electronic assets mature their worth lies only in the benefits to be gained from their disposal. This is when best practices and proper planning become essential elements of the asset management process.

Data Security is among the top concerns of businesses when disposing of electronic assets.

TECHNOLOGY DEPLOYMENT TO ELECTRONIC ASSET DISPOSITION

Telaid has developed a program, Telaid Electronic Technology Asset Disposal (TELTAD) that is designed to be flexible and affordable to your budget while assisting you in managing the risks associated with the disposal of old and obsolete electronic assets. TELTAD service strategies are designed to provide your business a set of options that will optimize value, minimized risk and incorporate warehousing and stocking of reusable assets as well as parts harvesting. Telaid provides industry knowledge and in several cases can find value in older assets in the remarketing channel that is shared with the client to defer the cost of proper disposal.

Telaid can provide total management of Electronic Assets utilizing our experienced professionals and providing best in class services by leveraging our state of the art Warehouse, Processing Center, Stage and Configuration Center, Dispatch Capabilities and our World Class Project Management Office.

Sustainability objectives are being met and it is easier than ever by using TELTAD services. We will provide you a series of Sustainability Reports and Solutions across the USA and Canada.

Data Security is one of the most important reasons to consider TELTAD services, during the asset lifecycle many regulations from local, state and federal agencies govern the way personal and corporate data is handled. TELTAD provides the highest level of security, and you will be confident not only your electronic assets are disposed properly, so is your data.

THE TELAID DIFFERENCE

Collaborate – Telaid utilizes over 120 W2 employees as well as a continuous team of trained and certified engineers

Industry Standards – From technology to insurances Telaid holds to the highest standards

Process and Procedures – We work with our clients to adopt and quality control their processes

Delivery – Assets are shipped and installed

Project Management – Process is set up once

Dispatch – Reducing touch points of assets creates a more compliant process

Destruction - Secure Hard Drive and Media Tape Destruction services throughout the USA and Canada. Validation of Inventory, Secure Chain of Custody and Absolute Data Destruction.

Waster to Energy Solutions - Where applicable Telaid will utilize waste to energy solutions to reduce the carbon footprint.

Choose one company, Telaid, for all your planning, design, delivery, deployment and management of technology from conception to grave.
