Did you know that an increasing number of companies insist on having at least one BICSI Installer or Technician on all installation jobs? Don't let this requirement stop you from winning your next bid!

As a BICSI Installer 1, demonstrate your commitment to increased knowledge of BICSI best practices and the most up-to-date codes and standards.

Take your installation career to the next level and gain the advantage. Attend IN101 at our BICSI (ATF) in Norcross, Ga.

IN101: BICSI Installer 1 Training

Gain the knowledge and skills you need to build a successful career.

Get your foot in the door and a head start on your competition with BICSI's comprehensive orientation to the information and communications technology (ICT) industry. IN101 is an intensive five-day, 40-hour course designed to provide entry level ICT cabling installers with the background, knowledge and basic skills needed to function effectively on the job.

Experience

Little or no cabling installation experience needed.

Who Should Attend

Anyone looking for an introduction to, or wanting to know more about cabling installation, including those wishing to pursue a career. Installer 1 training is for those with little or no cabling installation experience.

Knowledge and Skills

Must be able to distinguish between different colors and possess manual dexterity to complete fine motor tasks.

Course Materials

Students MUST bring a print version of the Information Technology Systems Installation Methods Manual (ITSIMM) to class.

The manual (NOT included in the course fee) can be ordered online here.

The workbook will be provided on first day of class (included in the course fee).

Course Preparation

Reading the ITSIMM before coming to class is strongly recommended for class and exam success. It's recommended that examinees spend at least 50 hours studying the *ITSIMM*.
