BICSI Technician
Training**

5.5-Day Course
M-F 8am-5pm
SAT: 8am-10am
Written Test

BICSI CECS
35

Advance your cabling installation skills for career advancement. Attend TE350 at a BICSI Authorized Training Facility.

TE350: BICSI Technician Training

Join an elite group of installers who possess this high level of skills training.

Take your installation performance to the next level through the study of specialized systems and advanced copper and optical fiber structured cabling systems. TE350 is an intensive five- day course that provides the necessary skill set of a structured cabling systems technician. An advanced study of copper splicing, testing and troubleshooting will open this course. A significant amount of course time will then be spent on the splicing, testing and troubleshooting of optical fiber cable. The third major topic covered in this class will be field coordination, including site surveys, blueprint reading, network infrastructure and project management. This course will also cover some special topics within ICT cabling installation.

Experience

Three or more years of current and verifiable ICT industry installation experience.

Who Should Attend

Highly experienced ICT cabling installers overseeing, planning and managing installation projects; individuals who hold the BICSI Installer 2 or both the Installer 2, Copper and Installer 2, Optical Fiber credentials.

Knowledge and Skills

Must be able to distinguish between different colors and possess manual dexterity to complete fine motor tasks. Topics taught in class build upon what is taught in IN225 and IN250.

Course Materials

Students **MUST** bring a print version of the Information Technology Systems Installation Methods Manual (ITSIMM) to class.

The manual (NOT included in the course fee) can be ordered online [here](#).

The workbook will be provided on first day of class (included in the course fee).

Course Preparation

Reading the ITSIMM before coming to class is strongly recommended for class and exam success. It's recommended that examinees spend at least 50 hours studying the *ITSIMM*.
